IMPORTANT INFORMATION – PRINT AND DISTRIBUTE

ALL THE FILES ARE AVAILABLE THROUGH THE URLs AND THE QR CODES

https://archive.org/details/simplesabotagefi26184gut/

For the people who don't have the ability to protest or are scared of becoming the next gruesome headline, the simple field sabotage manual is a guide on civil resistance and sabotage built by the OSS in order to fight the nazis during WW2, if you are able to, print out as many copies as you can, hand them out to neighbors and fellow protesters, instruct others to also do so.

Always remember: Armed minorities are harder to oppress

EXTREMELY IMPORTANT: Printers contain fingerprinting tech that uses microscopic dots of ink to identify the printer, a second hand fully offline printer and pc setup or public printer is recommended, along with this tool to further obfuscate the tracking dots:

https://github.com/DerEchteKay/InvisibleTrackingDots
https://github.com/dfd-tud/deda **(more modern alternative)**

Another thing to add is that military memetics are being used by the federal government, READ UP AND EDUCATE YOURSELVES AND OTHERS ABOUT THEM

https://www.robotictechnologyinc.com/images/upload/file/Presentation%20Military%20Memetics%20Tutorial%2013%20Dec%2011.pdf

https://bytes.usc.edu/cs585/s23-da-taaa/lectures/GPSETC/docs/IW.pdf

https://downacademia.net/documents/13449/memetic-warfare-the-future-of-war

Military memetics are not the only form of psyops being used, an American model of the firehose of falsehood has been deployed since at least 2015 (read up on the firehose of falsehood: https://www.rand.org/pubs/perspectives/PE198.html), debunking the misinformation has the opposite effect and increases its spread

https://www.jstor.org/stable/resrep18898?seq=1

https://www.lawfaremedia.org/article/toward-information-operations-kill-chain

The ONLY TWO WAYS to combat this is to spread awareness of how the psyop functions and what is propaganda AND to be the first one to spread the news, DO NOT LET THEM CREATE THE NARRATIVE, if ANYTHING happens citizen run online news networks must be quick to spread the information EVERYWHERE before the feds do

YOU ARE NOT IMMUNE TO PROPAGANDA

Please consider hosting and sharing information about the reticulum network stack, the reticulum network stack is a standalone network backbone infrastructure, its not like tor or I2P as it is made to FULLY replace the entire internet infrastructure and can run on LoRa, BAUD radio, WIFI, internet, coax, and practically anything you can think of that transmits data (and can run on as little as 5 BITS per second), it is encrypted with post quantum encryption by design and is source agnostic, so no one other than the recipient actually knows the address where a packet originated from, if you can please set up LoRa nodes (they are extremely cheap), or host a reticulum instance in your computer in order to allow for a secure, non fed controlled internet infrastructure alternative

https://github.com/markqvist/Reticulum

https://reticulum.network/ (the documentation)

https://github.com/liamcottle/reticulum-meshchat (for accessing nomadnet websites inside the reticulum network and chatting

https://github.com/markqvist/Sideband (for extremely secure anonymous encrypted messaging through reticulum)

https://github.com/markqvist/NomadNet (Websites for reticulum)

https://rmap.world/ (for connecting to other reticulum nodes over the existing internet infrastructure)

https://github.com/fr33n0w/rBrowser (multiplatform nomadnet browser)

https://github.com/torlando-tech/columba (alternative for sideband)

https://unsigned.io/guides.html (how to build reticulum nodes, both LoRa and BAUD radio)

https://github.com/kc1awv/rrc-gui (an IRC alternative for reticulum)

GrapheneOS is the most secure hardened open-source android OS distribution, it contains many features and is available for the google pixel phone lineup, if you plan on organizing, GrapheneOS is a practically a must
